Tasks

How to log in or create an account: You can log in if you already have an account on the main screen by entering your credentials, or create one by clicking on the Register button.

How to customize your profile: You can customize your profile in the My Profile section a couple of ways: uploading an image by clicking on the image button, writing a couple things about yourself in the "About me..." section, adding features of yourself, and there is a short bio section

How to connect to others: You can view other people's profiles who are using the website via the Connect tab and send friend requests or messages to that person in the Connect tab.

How to keep track of friends: You can keep track of people you have added to your friends list via the Friends tab.

How to create and keep track of events: You can create and view events via the Events tab. Clicking "New Event" will allow you to create one. Other people can see these events that you have on your friends list.

Commands

Register: allows you to create an account

Send: allows you to send a brief message to other users

New Event: allows you to make an event

Create: allows admins to create users

Update: allows admins to update users

Delete: allows admins to delete users

Help: allows you to see some brief help tips

Definitions

Users: whomever is using the system

Friends: other users connecting to each other

Photos: images users can upload

Blocked Users: users that other users have blocked

Notifications: alerts to the user that has received a message or a message has been received
